Networking & Infrastructure–Solutions& Design

Cache is a networking specialist for Systimax, Dlink, Beldon, AMP, Cisco, Avaya, Raritan etc and also provides its own structured cabling and Facility Management Services. Our experienced
certified networking team has installed a large number of networks for MNC's, Government & corporate clients. Cache is focusing on advanced technologies for supporting the platform of
of future Human Networks.

With certified networking professionals on the technical front and certified sales experts on the marketing front, it is easier for us to deliver the professional touch and finesse required to implement the network backbone for any organization for their smooth operations.

For the infrastructure solutions, power backup plays a major role where we have tied up with international leaders like APC to provide the same. Network design and suggestion also includes storage ideas and products from VERO President and HCL. With the above expertise we can design and implement complete LAN & WAN solutions for our esteemed clients.

Facility Management Services

The backbone for all solutions and automation in any organization is the smooth functioning of the IT assets and their effective deployment. The Facility Management Division of Cache under-stands the criticality of this and strives to provide its clients, a system environment that is that is efficient and delivers at the click of a button. The FMD undertakes comprehensive maintenance agreements to ensure near 100% uptime of systems.

The services of Cache FMS division include:

- **Facility Management**
- **Hardware & Software AMC's (Including Networks and Peripherals)**
- **Software Solutions**
- **Unscheduled System Support**

The FMS also includes the intricate and complex procedures for Asset & Server Management using the latest technologies for achieving the same.

Networking & Infrastructure–Solutions& Design

Cache Infotech

Cache is a networking specialist for Systimax, Dlink, Belton, AMP, Cisco, Avaya, Raritan etc and also provides its own structured cabling and Facility Management Services. Our experienced
certified networking team has installed a large number of networks for MNC's, Government & corporate clients. Cache is focusing on advanced technologies for supporting the platform of
of future Human Networks.

With certified networking professionals on the technical front and certified sales experts on the marketing front, it is easier for us to deliver the professional touch and finesse required to implement the network backbone for any organization for their smooth operations.

For the infrastructure solutions, power backup plays a major role where we have tied up with international leaders like APC to provide the same. Network design and suggestion also includes storage ideas and products from VERO President and HCL. With the above expertise we can design and implement complete LAN & WAN solutions for our esteemed clients.

Networking & Infrastructure–Solutions& Design

An Organization's security is now a very major concern as there is a fierce onslaught of viruses as well as the threat of hackers trying to create havoc. Cache provides solutions using premium and proven products available from organizations like Cisco, Checkpoint, Sonic wall, McAfee,
Trend Micro and Secure Synergy. Cache is closely aligned with all these organizations and has expertise to design & deploy the solutions available in their portfolio. In brief we do the following in providing complete security solutions at all levels:

Consulting: We do security consulting/auditing through Secure Synergy thereby aiding our clients to prevent their networks and mobile users against any security breaches.

IPS/IDS: We have expertise to implement Intrusion Prevention/Detection Systems from world class vendors like McAfee (Intrushield/Entercept)

Firewall: We provide both hardware and software based firewalls from Checkpoint-Nokia, Cisco(Pix & ASA), Sonicwall and Netscreen. We have the technical expertise to design and implement solutions for our customers.

Anti-X Services: We provide both network & client level Anti-Virus, Anti-Spam, Anti-Spyware and Content Filtering services based on hardware & software platforms

Messaging and Workflow Development

Businesses today rely on their messaging and their collaborating servers more than ever. This reliance means that you do not just need a way to send e-mail or create a Groupware. need a comprehensive messaging platform that includes the tools necessary to create rich collaboration application. Cache develops this messaging solution as per customer's requirement. Experts in the various domains of Messaging solutions of Cache design and implement the way the messaging systems have to be deployed to give the best output.

Storage Solutions

Data ranks as the most dynamic, fastest growing and most valued strategic corporate asset. In this age of technology advancements in the field of Data management and Protection, Cache
has partnered with the giants in Storage Networking Expertise and Solutions like the IBM, to help customers achieve greater business efficiency and continuity from their storage assets. At Cache,
we can help protect your existing storage investments and integrate your storage resources to make your storage environment more reliable, available and manageable through lower end
Solutions like Tape Libraries & Autoloaders to higher end solutions like Network Attached Storage(NAS) and Storage Area Network (SAN).

Multi-location Support

To provide better services and support to multi-location clients, Cache has siteoffices at Hyderabad, Mumbai (for Bombay as well as Pune and Ahmedabad region), Bangalore, Jaipur and Guwahati. These support offices & Business Alliances have helped us in providing the par excellence support that our prestigious clients demand in comparison to the service being provided at their Head Offices.
